

Friedrich Park - Eric Lautzenheiser, Nature Areas Superintendent for the City of San Antonio Parks and Recreation Department

Left: limestone formation.

Above: Glen Rose limestone, one of the two forms of limestone prevalent in Friedrich Park (the other being Edwards limestone). Glen Rose is around 100 million years old.

Gayfeather

Mountain Cedar seedling

Eric explaining the habitat restoration process.

Eric explaining plant succession

Left: Black-capped vireos peel the bark of mature Mountain Cedars to make their nests.

Below: the Friedrich Park hangout of the endangered Black-capped Vireo

Eric explaining the link between the eradication of the screwworm and the extinction of the black-capped vireo
(No screwworms = more deer = no new hardwoods = no vireos)
