February 14, 2017

Greetings:

We know you are aware of the new initiative of the Texas Parks and Wildlife Department (TPWD) creating a Texas Waters Specialist designation.

The Alamo Area Master Naturalists foresee a huge, positive impact from this program for our area; therefore, we have invited Johnnie Smith to our March 14th general meeting. Johnnie is the lead person at TPWD for this program and should have information about the program and be able to answer our questions.

The meeting starts at 7:00 pm in Classroom 208 (2nd floor) at the AgriLife Extension Building, 3355 Cherry Ridge (SE of Callaghan & IH10).

The reason we are so excited about this program's potential is that it allows not only Master Naturalists, but the general public, to be Texas Waters Specialists volunteering in service programs in our watersheds. We see many area agencies benefiting from a new pool of volunteers.

If you want to find out more about the program before the meeting, please see:

<https://tpwd.texas.gov/education/water-education/texaswatersprogram/texaswatersspecialist>

We hope you or a representative from your agency will join us.

Martha Cray
President, Board of Directors
Alamo Area Chapter
Texas Master Naturalists
