3D Sun	<p>A major solar flare erupts on the sun. Before long, your phone chirps in your pocket to let you know! Pulling out your phone, you see a 3D view of the sun — a digital reconstruction of satellite images freshly downloaded from NASA's "STEREO" satellites, orbiting millions of miles away.</p> <p>You rotate the sun with your finger to view it from any angle. You pinch in and out to zoom in for a closer look at the sun's ever-changing surface.</p>	Compatible with iPhone, iPod touch and iPad. Requires iOS 4.0 or later; and Android . FREE	1/3/2012	iPhone - 4 out of 5 in 10 ratings; Android - 4 out of 5 in 51 ratings
Distant Suns 2	<p>[Note: This version is better for pre-iPhone3GS level devices. If you have a newer device, take a look at Distant Suns 3, which takes advantage of the greater memory, better displays and faster chips].</p> <p>Originally started in 1985, it has become one of most venerable software titles around.</p> <p>Sporting a database of over 130,000 stars, along with nebula and galaxies, Distant Suns has earned the reputation of both having one of the most realistic displays of the night sky, while being one of the easiest to use astronomy programs available for the most casual sky watchers and serious astronomers alike.</p>	Compatible with iPhone, iPod touch, and iPad. Requires iOS 3.0 or later. \$5.99	1/3/2012	5 out of 5 in 91 ratings
Distant Suns 3	Sporting a database of over 300,000 stars, along with nebula and galaxies and solar system simulator, Distant Suns has earned the reputation of both having one of the most realistic displays of the night sky, while being one of the easiest to use astronomy programs available for the most casual sky watchers and serious astronomers alike.	Compatible with iPhone, iPod touch, and iPad. Requires iOS 3.0 or later. \$9.99	1/3/2012	4.5 out of 5 in 53 ratings

Pocket Universe: Virtual Sky Astronomy	Have you ever looked up at the night sky, and wondered what exactly you were looking at? Pocket Universe is an easy-to-use app that will help you learn constellations, bright stars and planets. You can literally hold up your iPhone 3GS/4 or iPad in front of you, and the app will use the built-in compass to display the same view of the sky you see - but one that's complete with names and information. If you want your kids to learn the constellations, or to impress a date with the names of the stars, this is the only app you need.	Compatible with iPhone, iPod touch, and iPad. Requires iOS 4.2 or later. \$2.99	1/4/2012	3.5 out of 5 in 12 ratings
Star Walk - 5 Stars Astronomy Guide	Star Walk enables you to point your iPhone at the sky and see what stars, constellations, and satellites you are looking at in real-time. Please note, you will need a 3GS/4/4th gen iPod Touch for motion tracking, otherwise this app will be just a beautiful info-packed time-sensitive interactive star atlas that allows you to set your location manually to give you the most accurate picture.	Compatible with iPhone, iPod touch, and iPad. Requires iOS 3.0 or later. \$2.99	1/4/2012	4.5 out of 5 in 119 ratings
