Our purpose and enjoyment of being a Master Naturalist is in seeing our own vision of preserving and maintaining the natural world being passed on from one generation to the next. Educational Outreach involves actively getting involved in seeing this vision take hold in our community.

Educational Outreach doesn't mean just working with children, it also involves reaching adults and the Denton County community at large. There are many different areas of participation which can be incorporated into several categories of interest.

Here are some of the things that are included in the Education Outreach Project:

1. Talking to civic groups on environmental issues.
2. Writing articles for the newspaper and civic newsletters.
3. Leading or assisting group hikes at any of the Denton County parks.
4. Helping with a Master Naturalist booth at various fairs and public events.
5. Working with school groups by:
  - a. Helping judge Science Fairs
  - b. Trail interpreters at Clear Creek
  - c. Assist Growing Up Wild presentations
  - d. Assist SWAt presentations
  - e. Talking to classrooms on areas of nature that are of interest and understanding to you
6. Working with Scout groups on projects that they are doing or leading them on hikes.

Please join us in becoming an active participant in reaching out to others about the natural world and what it means to the community at large.
