

Project #P060907

Wood Duck Nesting Boxes

Bill Hammon

This project is an extension of a Texas Parks and Wildlife Department project at Fort Parker State Park in Limestone County. It is an ongoing project.

The purpose of the project is to construct and maintain Wood Duck nesting boxes. As the flora around the lake changes, the nesting boxes must be moved to better locations. Each year all the boxes must be cleaned and resupplied with nesting material and the inside soaped to discourage wasps from placing nest inside the boxes. Also, any boxes lost during the previous summer and fall need to be replaced.

Please contact me if you are interested in helping with the project.
