

TMN Curriculum Distribution

The Texas A&M AgriLife Bookstore distributes the Texas Master Naturalist Curriculum. Chapter orders can be placed through the local County Extension Office or directly through the Bookstore. Extension Agents and county secretaries can assist with placing the order. Payment is expected when you order. Checks should be made payable to AgriLife Bookstore. If the Chapter wants to place the order themselves they can either go onto the Bookstore website or call the Bookstore at 888-900-2577.

The Bookstore will also accept payment by Visa or Master Card for on-line orders. If they are tax exempt they will need to pay for the order with a Chapter check or Chapter credit card. NO PERSONAL CHECK OR CREDIT CARD will be accepted for a tax exempt order.

Chapters will need to provide their tax ID/Exemption number (if they have one), otherwise, tax will be charged for the order.

The Bookstore can be contacted by visiting <http://agrilifebookstore.org> and selecting the "Browse the Shelves" then "Environment & Natural Resources" and then "Texas Master Naturalists" or follow this link: <http://www.agrilifebookstore.org/category-s/1841.htm>

The phone number is 979-845-6573 (Local number) or Toll free 888-900-2577 and fax is 979-458-0172.

When ordering request **TMN-3568-C**, TMN Curriculum. Your order will include the binder insert and binder spine. Binders are not included. Indicate your chapter name when ordering and be sure to include shipping instructions.

The curriculum price will remain at \$30.00 per copy when sold to Texas Master Naturalist Chapters. Shipping charges will be added to your order. A minimum order of 5 copies is required to receive the wholesale price. Again, be sure to include your chapter name when making the order.

You will note that the Bookstore web site shows TMN curriculum item **TMN-3568** and its retail price of \$75.00 per copy. TMN-3568 **should not** be requested by chapters.

We continue to get requests to purchase copies from individuals who are not in the Texas Master Naturalist program. Our commitment is to our members first and we believe the retail price increase will reduce the requests from others thus reducing the chances of a shortage for Texas chapters.
