

April 28 – May 1, 2023

# City Nature Challenge

## Tyler/East Texas

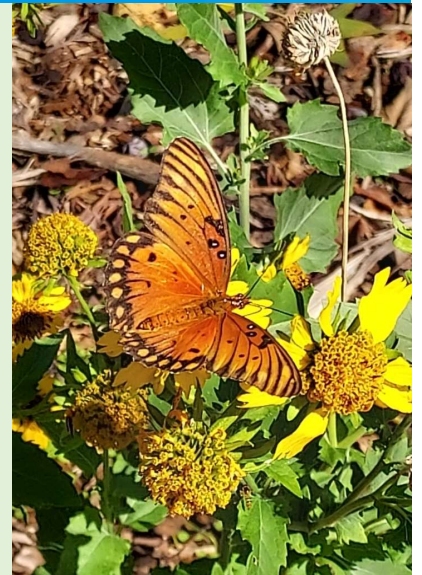

Do you like observing nature?

Make your observations count!

Join the

City Nature Challenge

& become a citizen scientist!

Join us in a fun challenge to see which city can document the most species during April 28 - May 1. It's easy to participate by making observations using the iNaturalist app. With iNaturalist, you take a picture of a plant or animal, & the community will help identify it. Observations in the greater ten county region of East Texas (Anderson, Cherokee, Gregg, Henderson, Rains, Rusk, Smith, Upshur, Van Zandt, Wood) will count during the four-day challenge. You can participate by exploring the life in your backyard, your local park, or on a field trip with your local naturalist group.
