

LUNCH & LEARN

UNCOVERING THE UNUSUAL POLLINATORS OF A RARE TX PLANT

Join us to learn why rare plants matter. Texas prairie dawn is an endangered plant species found only in East Texas. Julia Freeman from the University of Illinois describes relationships between rare plants and their pollinators.

Meet at Timber Lane Utility District Community Center at 1904 NapleCHASE Crest Dr. Spring, TX 77373.

Monday, March 16

12 - 1:30 p.m.

1904 NapleCHASE Crest Dr.
