Each year, Highland Lakes Master Naturalists organize spring training classes. Registration information goes out in Fall, with classes forming by December. Training sessions begin in March.

The sessions meet once a week for twelve weeks from 8:00 to 3:00. The trainings are classroom and “in the field” at various venues in Blanco, Burnet, Llano, and Travis County. Units of study consist of geology and archeology, ecological regions of Texas, land management, weather and climate, entomology, and other natural resource related topics. Training topics are taught by regional experts.

We keep our class size at 20. The $180 tuition covers the cost of the Texas Master Naturalists Statewide Curriculum textbook, speakers and field trip destinations.

Contact Billy Hutson for registration info at theoatmealcowboy@yahoo.com. The Chapter website is www.txmn.org/highlandlakes
