

Engineered Environments: Bridges

Bridges are structures that allow people to easily travel across complicated environments. These environments can be natural, like rivers or canyons, or they can be human-made, like roads and buildings. There are several different kinds of bridges, and some types of bridges are better for certain environments than others. Which environments are each of these bridges best for?

Arch Bridge

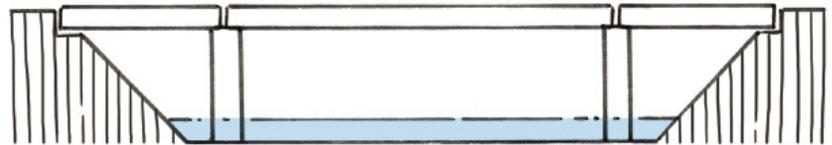

Pennybacker Bridge in Austin, TX

Beam Bridge

Devils River Bridge in Val Verde County, TX

Suspension Bridge

Regency Bridge, Regency, TX

Truss Bridge

Old Central Expressway Bridge, Dallas, TX
